terrazzo for your region

Flooring Cost Breakdown

When considering a floor for any project, architects and designers must factor in durability, design, and maintenance. Terrazzo offers a considerable return on investment as it remains the lowest life-cycle of any flooring on the market. Now while terrazzo has a high initial cost per square foot of area, it has a long-term cost advantage over other flooring types. Think about it. While some flooring options will need repairs and replacements over the years, terrazzo's durability allows the floor to last on average up to 75 years.

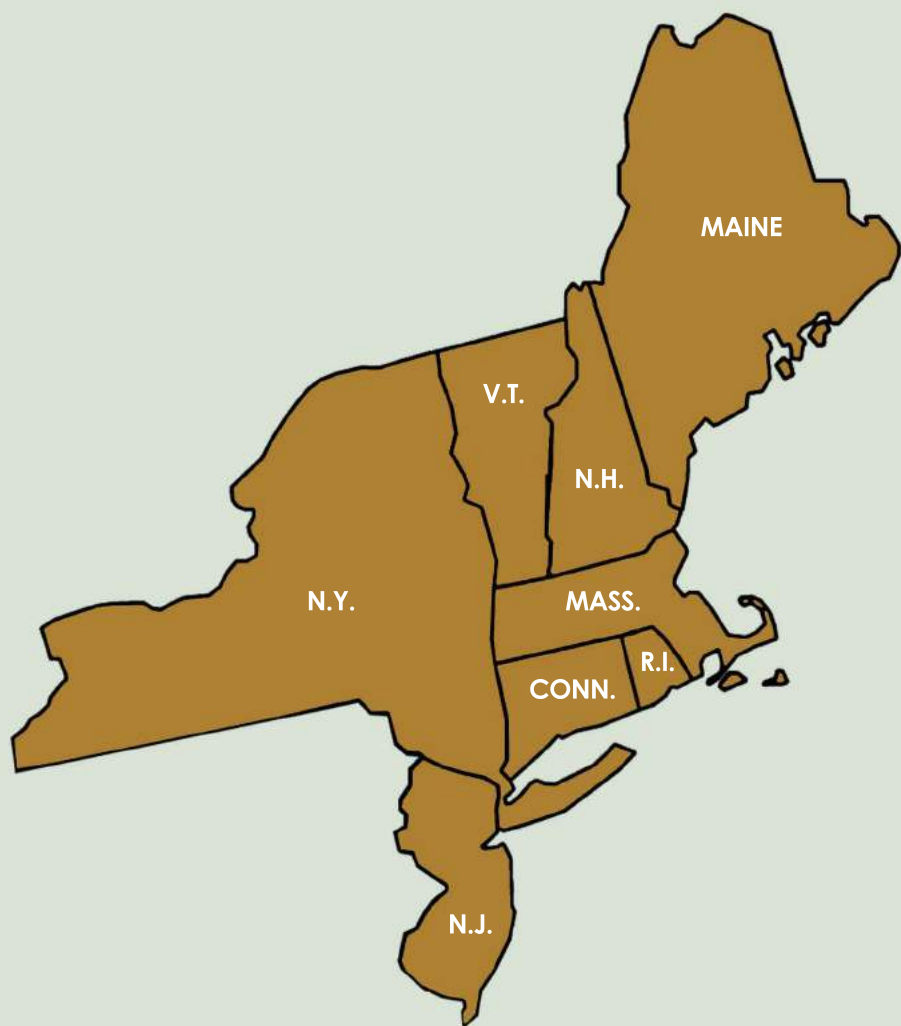

The National Terrazzo and Mosaic Association provided pricing data for each region of the United States. Check your state's region to find accurate pricing for thin-set epoxy terrazzo. The pricing is a model that helps determine the actual cost of flooring during a building's life-span.

Terrazzo provides design quality and comfort for many high-traffic areas such as schools, corporate offices, hospitals, government buildings, airports, restaurants, and other commercial institutions. With the resurgence of terrazzo today, architects and designers can use terrazzo for flooring, wall panels, countertops, and staircases.

Have a project and need pricing information? Our estimating team can provide quotes on the size of the project. Email us at info@doyledickersonterrazzo.com or call us at (704) 921-4940. In the meantime, learn more information about terrazzo at our website and at NTMA.com. Enjoy this brochure!
