

TERRAZZO

PROJECTS

2017

DOYLE DICKERSON TERRAZZO

Doyle Dickerson Terrazzo, Inc. is one of the leading terrazzo contractors in the Southern United States. Over the past year, the company has been growing at an accelerating rate, completing construction projects in the commercial sector.

Doyle Dickerson Terrazzo specializes in the installation of epoxy terrazzo; also restoring terrazzo floors that have been installed decades ago. Today there is a high demand for green building materials. When searching for a floor finish, architects and designers look for features such as durability, low maintenance, design aesthetics and sustainability. Epoxy terrazzo is one of the best flooring investments available, and has the lowest life cycle cost among all flooring finishes.

This is the 2017 Edition of Terrazzo Projects, a photo book showcasing some of the completed and on-going epoxy terrazzo projects that Doyle Dickerson Terrazzo has installed within the past year. Doyle Dickerson Terrazzo has installed epoxy terrazzo for many commercial buildings such as schools, universities, government centers, hospitals, hotels, airports and restaurants. Terrazzo leaves a lasting impression for all.

6TH AVENUE JOINT HEALTH EDUCATION CENTER

Location: Hendersonville, North Carolina
General Contractor: Vannoy Construction
Architect: Clark Nexsen

3,500 square feet of epoxy terrazzo was installed at this facility. One of the highlights of this project is the unique structure of the precast staircase in the building's lobby. Precast terrazzo surround both sides of the stainless steel glass railing.

ALCOA HIGH SCHOOL

Location: Alcoa, Tennessee
General Contractor: Merit Construction

Epoxy terrazzo was installed in the the school's lobby and cafeteria. A large-scaled terrazzo logo sits nicely in the center of the school. The tornado design was precisely cut using today's waterjet technology. The cafeteria includes a shiny terrazzo floor, offering a low maintenance and easy to clean floor.

APPLE STORE

Location: Jacksonville, Florida
General Contractor: SAJO

Apple® stores deliver an engaging customer experience each time a visitor enters through the door. Apple® stores around the world create an innovative store design including terrazzo, which bounces natural light around the store. This is a store that welcomes customers to gather around.

ASU HUNTER STRAIN

Location: San Angelo, Texas
General Contractor: Western Builders of Amarillo
Architect: PBK Architecture

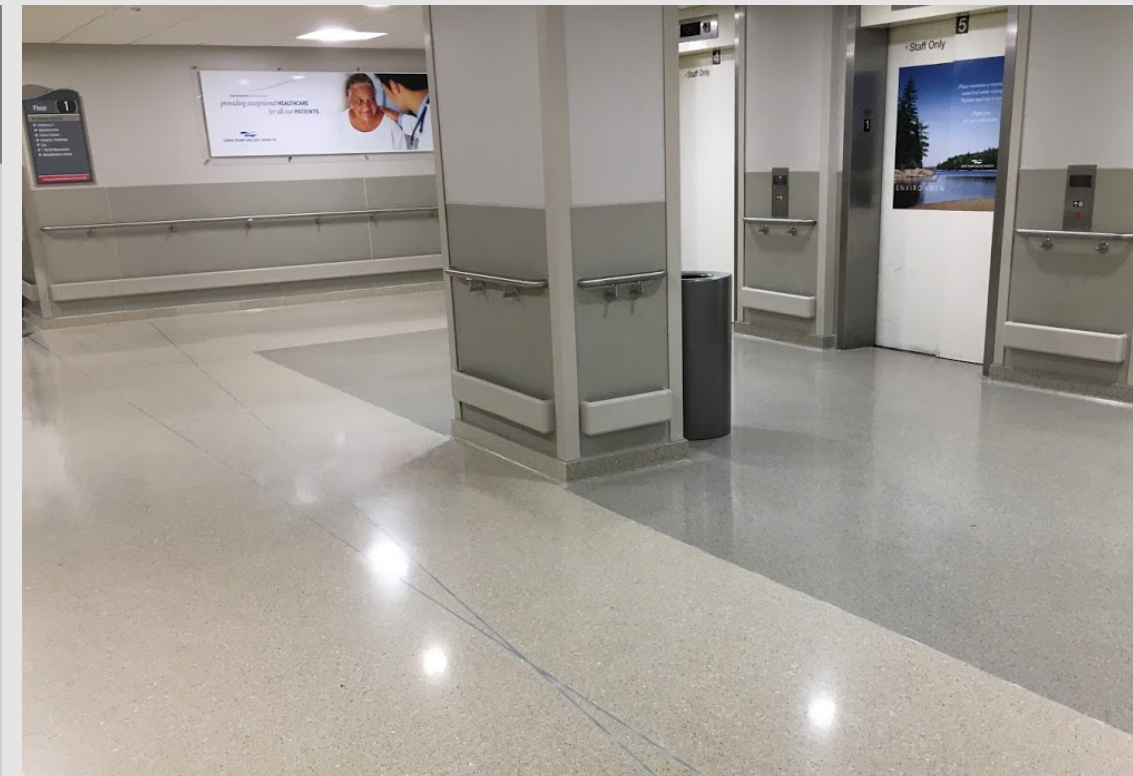

Doyle Dickerson Terrazzo installed a 60 x 40 feet terrazzo design at ASU, using a vast color palette to depict the campus map.

CAPE FEAR VETERANS HOSPITAL

Location: Fayetteville, North Carolina
General Contractor: Riley Contracting

Doyle Dickerson Terrazzo installed 9,560 square feet of epoxy terrazzo for the first floor corridor at Cape Fear Veterans Hospital. The terrazzo floor has a beautiful surface complexiion often seen in today's healthcare design. The terrazzo floor promotes a healthy flooring with zero VOC content, increasing the overall air quality of the facility. The terrazzo floor provides a seamless finish that guarantees a smooth and noiseless stroll for patients.

CHARLOTTE DOUGLAS INTERNATIONAL AIRPORT

Location: Charlotte, North Carolina

One of Doyle Dickerson Terrazzo's ongoing terrazzo projects is at Charlotte Douglas International Airport. The project includes multiple phases that covers terminal and concourse expansions, restroom renovations, and retail store installations.

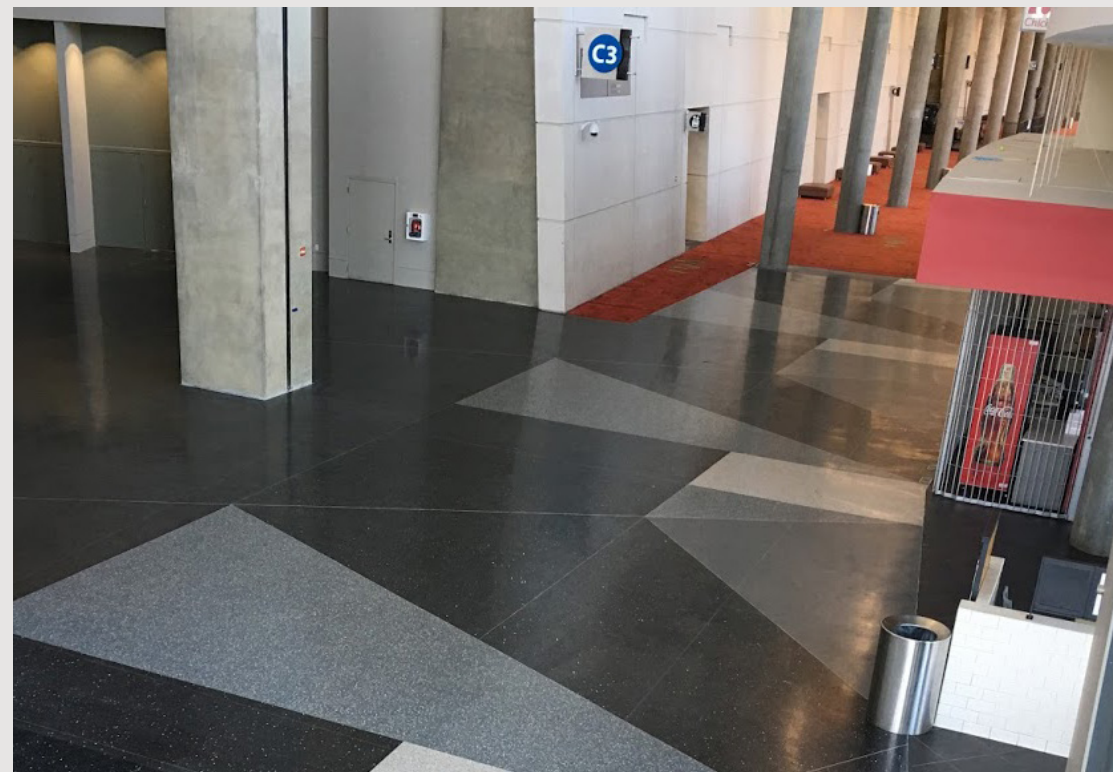

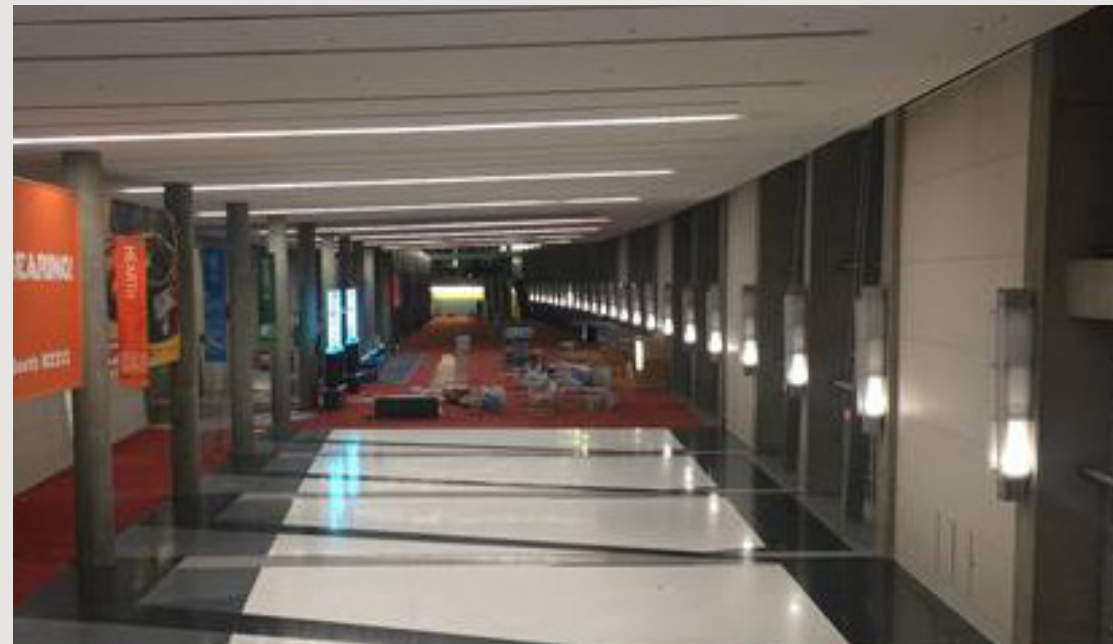

Charlotte Douglas International Airport is among the busiest airports across the country. With such growth, the airport is designing for the future.

So far, Doyle Dickerson Terrazzo has completed terrazzo in the east and west terminals, the baggage claim area, and restroom renovations.

With constant travelers passing through daily, these floors are easy to maintain. They also have an aesthetic beauty that is a welcoming sight for travelers arriving in Charlotte as their destination landing or making a quick stop in Charlotte before traveling to another city.

Charlotte Douglas International Airport is progressing through towards the project's completion. Each new addition is a sure way to expand the facility to meet overall growth and improve the traveler experience.

GEORGIA WORLD CONGRESS CENTER

Location: Atlanta, Georgia
General Contractor: GWCC
Architect: Thompson, Ventulett, Stainback

Georgia World Congress Center is the third-largest convention center in the United States.

Doyle Dickerson Terrazzo is working at this job site throughout 2017. To begin the epoxy terrazzo installation, installers removed the carpet that was originally installed beforehand.

A sleek terrazzo design with multi-color patterns is seen upon entering the building. While this is nearing completion, by the end of the project, Doyle Dickerson Terrazzo is expected to have installed 83,911 square feet of epoxy terrazzo, giving Georgia World Congress a new look and feel.

HANOVER COUNTY COURT BUILDING

Location: Hanover, Virginia
General Contractor: Gulf Seaboard
Architect: Moseley Architects

Doyle Dickerson Terrazzo installed a seamless epoxy terrazzo floor throughout Hanover County Court Building, extending from the building's corridors to office spaces. Terrazzo flooring has become a staple for government centers, offering a professional and appealing appearance in the overall floor design.

HALIFAX HEALTH DELTONA

Location: Deltona, Florida
General Contractor: Perry McCall Construction, Inc.
Architect: Flad Architects

Doyle Dickerson Terrazzo installed 1,000 square feet of epoxy terrazzo at the Halifax Health Center. The terrazzo construction installers developed a unique floor pattern that encompasses different geometric shapes coming at different angles of the room. Not only does the terrazzo floor present an inviting atmosphere for the hospital's visitors, but the terrazzo is easily manageable.

LAKESIDE JUNIOR HIGH SCHOOL

Location: Springdale, Arkansas
General Contractor: Baldwin & Shell Construction Company
Architect: Wittenberg, Delony & Davidson

One of the highlights at Lakeside Junior High School is the school's logo found in the center of the school. Logos are a great way to reinforce brand identity for a school, helping to raise school spirit throughout the year. Elsewhere, Doyle Dickerson Terrazzo installed multi-colored terrazzo designs in the cafeteria, and the corridors along the school lockers and auditorium.

MARION PERFORMING ARTS CENTER

Location: Marion, Arkansas

General Contractor: Baldwin & Shell Construction Company

Architect: Pat Kelly Magruder Architects

Epoxy terrazzo was installed in the performing art center's main lobby. This center is a hub for performances for the entire school district in Marion, Arkansas. With new visitors expected to attend this facility, a low maintenance floor is needed. The flooring provides ample spaces for attendees to gather prior to and after the performances.

LENOX TOWERS

Location: Atlanta, Georgia

General Contractor: Goddar Group

Lenox Towers leases suites in Atlanta, Georgia. Doyle Dickerson Terrazzo installed a gorgeous white epoxy terrazzo floor throughout the building. Lenox Towers has a rich history behind the complex, and will continue to thrive with its new terrazzo floor for many more years to come.

RICHLAND COUNTY LIBRARY

Location: Columbia, South Carolina

General Contractor: Contract Construction

Architect: The Boudreaux Group

Doyle Dickerson Terrazzo installed 6,700 square feet of epoxy terrazzo, with black accent squares displayed in the terrazzo floor. With a seamless floor in place, visitors can read and study in an engaging environment.

SOUTH BAY HOSPITAL

Location: Sun City Center, Florida

General Contractor: CPPI

Architect: TMPartners

This beautiful terrazzo project in Western Florida brings sustainability and modern design to the forefront of South Bay Hospital's entrance and building's hallways. Doyle Dickerson Terrazzo installed 1,507 square feet of epoxy terrazzo here. Upon entering the building, patients and visitors will gaze upon an immaculate terrazzo design. The terrazzo helps transform the hospital to meet today's design standards in terms of creating a customer-centric environment as well as address today's shift towards using environmentally and economical materials.

ST. JOSEPH HOSPITAL

Location: Knoxville, Tennessee
General Contractor: Blane Construction Corp.

St. Joseph's Hospital in Savannah, Georgia was renovated in 2016 to improve the patient experience.

To enhance the overall aesthetic image, new epoxy terrazzo flooring was installed in the main lobby of the building. 1,250 square feet of epoxy terrazzo was installed over the course of this project.

What is most noticeable about the terrazzo's design is the gorgeous Mother of Pearl aggregate, a seashell-based material seen in many terrazzo installations today.

This hospital also includes custom precast cove base and 8 round terrazzo columns.

UNIVERSITY OF TENNESSEE

Location: Knoxville, Tennessee
General Contractor: Blane Construction Corp.

Doyle Dickerson Terrazzo installed 23,074 square feet of epoxy terrazzo at the University of Tennessee's Student Center.

This high-polished floor welcomes all new and returning students each year. The epoxy terrazzo floor is expected to withstand thousands of students who will walk these halls each day.

The terrazzo floor consists of recycled glass chips, which promotes sustainable design. Universities around the country are transitioning to epoxy terrazzo for its long-term durability and design aesthetics. Studies have shown that a floor design has a positive correlation to a student's academic performances.
